

Burundi Fiber Optic Broadband

Overview

BBS runs Burundi's national fibre-optic backbone. It provides IP transit and reliable broadband links for service providers and institutions. It was founded in 2010 as a public-private partnership. As a result, several states in the continent are actively embracing digital solutions. BBS specializes in design, construction and operation of very high speed networks. The government in early 2018 began the Burundi Broadband project, which plans to deliver nationwide connectivity by 2025; mobile operators have launched 4G and LTE mobile services to capitalize on the. Onatel WiMAX is a broadband internet access offer from Onatel Burundi. It is based on WiMAX, wireless technology which allows to connect to Internet through a special modem using ground infrastructure operated by Onatel. The company offers four variants of download speed, technical assistance and. EU Support to Africa's National Broadband Mapping Systems (Africa-BB-Maps) Africa-BB-Maps Questionnaire Report-BURUNDI 26-27 March, Abidjan, Cote d'Ivoire Dr Samuel MUHIZI, Director General of ARCT PICTURE Introduction Burundi (pronounced: the Republic of Burundi) is a landlocked African country.

Burundi Backbone System

Burundi became a member of the East African Community in 2007. At this time, only 7% of the population had mobile telephones and internet services were via expensive satellite channels. It was important to gain a connection to the first open access submarine cable in the region, the Eastern Africa Submarine System (EASSy). The landline incumbent Onatel Burundi formed a consortium with other Burundian telecommunications
