

Cable Tray Photovoltaics

Overview

A cable tray is a mechanical support system that carries DC, AC, and communication cables across a solar installation, helping with protection, ventilation, and neat routing so the system performs safely for many years. Choosing the right solar cable tray for photovoltaic energy is important if you want a stable system, reduced maintenance, and long-term safety. A well-designed ensures that these connections remain. o win partnerships. Only in this long way, we are able to develop all the necessary knowledge and experience to apply this into the market as a quality service with hard cable containment. Our product range comprises closed cable tray, wide span tray and mesh cable tray systems. The covers are secured. When it comes to designing and engineering large scale solar parks, not only materials such as solar panels and mounting systems are needed, but also cables and cable trays.
