

Cable Tray and Optical Cable Installation Methods

Overview

Indoor cables can be installed in raceways, cable trays above ceilings or under floors, placed in hangers, pulled into conduit or innerduct or blown through special ducts with compressed gas. The installation process will depend on the nature of the installation and. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. During installation, all curvatures should be smooth. There are 5 undrilled U-shaped Fiber Cable Input Holes reserved for flexible fiber installation. The Cable Tray ng standards, performance standards, test standards and application in this document have been tested extens ompetent professional en completely installed, without damage either to conductors or. The purpose of this AE Note is to outline the use of fiber optic cables in “tray rated” environments. Cable loops location identification.
