

Cable tray accessories are vertical and stable

Overview

Brackets and supports fix the trays in horizontal and vertical sections. The cable support lengths and fittings can basically be designed as cable trays, cable ladders or mesh cable trays, in which cables are routed. Fittings can, on the one hand, be used for horizontal or vertical changing of the routing direction or, on the other, to change the height or width of the. Selecting the right cable tray accessories is crucial for the safety, stability, and ease of maintenance of any electrical system. By -piece tray is typically used in applications where visual esthetics are important. The cable trays feature slot patterns allowing for optimal and efficient positioning of equipment and easy access for cable ties and other fixings such as tubing clamps.
