

Cable tray climbing slope

Overview

Cable tray ladders are an alternative to cable trays that may offer better support and cable management on sloping surfaces. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to the enclosure. This method statement covers the site installation of the cable tray & ladders and the requirements of checks to be carried out. This section will guide you through the necessary steps to ensure a successful cable tray installation must comply with specific technical standards to ensure electrical safety, system reliability, and long-term maintainability.
