

Cable tray connecting mesh belt

Overview

The answer: use the right connection accessories for a secure, aligned and continuous cable support system. In most cases, sections of wire mesh baskets or electrical cable trays are joined using couplers, bolts, or proprietary connector kits. Systems support and route all types of cables. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be ambient temperatures of - 20 °C to + 120 °C. Benefit from easy installation, maximum cable capacity, improved airflow, and a customizable design to meet your facility's unique needs. Experience the innovation of Legrand's P31 cable tray - fast. When you're dealing with network cabling infrastructure, you don't want your cable trays or wire mesh baskets going off in different directions like they've had an argument.
