

Cable tray support brackets without drilling

Overview

Matted with non-slip pads and fixed with clips under the table cable management tray can truly do without punching holes, stickers, glue, and will not damage the table. The cable tray can be suspended from one side so that it can be hooked into two of the four brackets - hangs down at an angle to the side. This makes it noticeably more convenient, to rearrange cables. My cable tray with the power strip and cables stored in it hangs stably. Hollowed out cable management tray made of pure metal material can better help ventilate and dissipate heat from the power strip and cable, more secure. Only 2 screws are needed to install the clamp into the cable. Our most popular products based on sales. Ideal for any office desks and standing desks within 0.3in. Learn why IT Pros trust StarTech. Whether you're concerned about damaging surfaces or simply looking for a more convenient installation method, there are alternative options available that allow you to install cable tray brackets without drilling holes.
