

# Cable tray wiring code

## Overview

The International Electrotechnical Commission (IEC) provides detailed guidelines for cable tray systems under IEC 61537. This standard outlines the construction requirements, testing methods, and performance parameters for cable trays and related support systems. The B-Line series Cable Tray Manual was produced by our technical staff. For proper installation, design, and maintenance, adherence to international standards is essential. The Cable Tray ng standards, performance standards, test standards and application in this document have been tested extensively by competent professional engineers and completely installed, without damage either to conductors or components. Cable tray systems have become an essential component in the infrastructure of modern commercial buildings, smart offices, data centers, and various industrial facilities. These systems provide an efficient and adaptable solution for managing a wide range of cables, including power cables, control.
