

Ceramic ferrule exposed standard

Overview

Ceramic ferrules are well known for having high durability and the highest levels of dimensional control, making them suitable for use in all fiber applications (both singlemode and multimode) specified in TIA/EIA-568-B. 1 cabling architecture standards. Kyocera's extrusion molding process creates ferrules with excellent coaxiality, and our precision machining ensures excellent concentricity with precise. They are made of zirconia ceramic, which offers the highest performance and durability of all ferrule material types. Our Custom Ferrules are designed to meet unique requirements for a wide range of. Each ferrule is defined by bore size, length, and outer diameter. Rosen offer various shapes of ceramic ferrules. Get advice! We are happy to assist you with any questions regarding stud welding and our products.
