

China Unicom fiber optic router cannot be turned off

Overview

Verify the connection setting of your Web browser, and verify that the HTTP Proxy feature of your Web browser is disabled so that your Web browser can read the configuration pages inside your router. Clear all the check boxes. Step 1: Connect the router to the power source and to your telephone or internet service provider's line. Make sure that you correctly performed all the steps in Before You Begin. If your computer was configured to use a static IP address, you must now reconfigure it to Obtain an IP address automatically. Make sure that your computer is using an IP. China Unicom mobile subscribers and data card customers can visit China Unicom retail store, or calling 10010 customer service hotline, or send SMS to 10010 to activate or deactivate the WiFi or WLAN service: • Activate WiFi or WLAN service□SMS "TYWLAN" • Deactivate WiFi or WLAN service□SMS. The Web User Interface can be used to change the settings of the Broadband Router. A brief description of these settings is provided below. Open an Internet browser and enter the Broadband Router's IP address.
