

Classification of Relay Protection Objects

Overview

Types of Protective Relays: Protective relays are categorized by their mechanism (electromagnetic, static, mechanical) and function (time-based, current, voltage). Static Relays: Use electronic components without moving parts. In this post, we shall discuss different types of Relays like Latching Relay, Reed Relay, Solid State Relay, Differential Relay, Automotive Relay, Timer Delay Relay, Reed relay, Polarized Relay, and many more. Its primary function is to detect abnormal conditions, such as. The relay operation is a function of the input quantities, such as current, voltage, impedance, and/or phase angle. For example, unselective protection operation during a medium voltage network fault will cause an outage for an unnecessarily large number of consumers. While this is bad, It's not a.
