

Complete set of compensation cabinet distribution box

Overview

A new type of outdoor comprehensive distribution box suitable for urban and rural power grid renovation, industrial and mining enterprises, street lighting, residential areas and other AC 50Hz, rated voltage 380V distribution systems, with multiple functions such as energy. A new type of outdoor comprehensive distribution box suitable for urban and rural power grid renovation, industrial and mining enterprises, street lighting, residential areas and other AC 50Hz, rated voltage 380V distribution systems, with multiple functions such as energy. The capacitor compensation cabinet connects capacitors in parallel, injecting capacitive reactive power into the system to offset the reactive power demand of inductive loads. This raises the power factor to above 0.95, cutting down on electrical energy waste. The reduction in reactive power lowers. Buy a wholesale compensation box and experience smooth management and distribution of electricity. Established long-term business collaborations with Fortune 500 companies such as Schneider, ABB, Siemens, and other renowned brands. A new type of outdoor comprehensive. High Voltage Capability: The GP Capacitor Bank is designed for medium and high voltage applications, suitable for use in mines, high-rise buildings, and large-scale management systems, ensuring efficient power distribution.
