

# Core Network Switch Development Solution

## Overview

Includes dual power supplies, hot-swappable modules, link aggregation (LAG), and support for HSRP/VRP. Modular chassis or stackable designs make it easy to scale as your network grows. A data centre is a physical facility that organisations use to store their critical applications and data. Cisco Catalyst and Meraki Campus LAN core and distribution switches are scalable, secure network switches with exceptional intelligence. Built to support high-performance applications, our managed switches empower IT administrators to fine-tune network traffic, enhance security, and scale effortlessly—all while ensuring. The 3GPP is an international collaboration between seven telecommunications standard development organizations (ARIB, ATIS, CCSA, ETSI, TSG, ITU, and TTA) that collaborate to create and maintain the technical specifications for 2G, 3G, 4G, LTE-Advanced, 5G, 5G advanced and future 6G. We deliver switching solutions designed for data center environments with high traffic volumes, supporting east-west traffic, virtualization. The global data center switch market was valued at US\$ 16.4 billion in 2023 and is expected to reach US\$ 24.
