

# Denmark galvanized cable tray span

## Overview

At a fixing span of 3000 mm, these heavy duty trays are able to handle a point load of up to 200 kg. Cable trays of a special size can be produced according to customer requirements. In long and extra-long span installations, the placement of splice plate locations become much more. , ABB offers steel cable tray with pre-galvanized and hot-dip galvanized galvanization is an economical and effective way to protect steel against corrosion, naturally oxidizes when exposed to air, but at a much slower rate than steel. Zinc provides sacrificial protection, which means that it corrodes while protecting the steel. Cable trays are used for cable management in power plants, industrial facilities, and data centers. They provide ventilation to heat-producing cables such as power communication and other with the same or different width of the cable run. All fittings are available in sizes and types corresponding to the straight cable tray sections. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. 1 \$OXPLQXP /DGGHU type cable tray longitudinal members shall be 4-1/2, 6, 7, 8, or 10 deep extruded aluminum channels or I-Beams of 6063-T6 aluminum alloy.
