

Distribution box corresponding to the module

Overview

The MDB-M24 is an indoor wall box, particularly adapted for FTTH Building (MDU) cabling. The MDB-M24 allows the connection, through patch panels or directly by splices, between the optical fibres feeding the MDU, and the optical fibres from the cables coming from the building. Wiring diagram shows both PNP and NPN wiring. Actual units use PNP status indicator, NPN status indicator, or neither. Dimensions are shown in mm (in. According to. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. We also highlight how reliable manufacturers like NUOMAK support stable, compliant, and cost-effective power distribution.
