

Drilling holes in steel cable trays

Overview

Drill the drill holes with $\varnothing \geq 7$ mm in the tray rail and tray base. To avoid transverse bending at higher loads, a joint plate must be used for tray widths of 400 mm or more in the joint area of the cable trays that are to be connected. 1 Contractor has to carry out fabrication and Installation of MS support including following activities - Contractor has to fabricate wall mounted support of MS angles (size 50 x 50 mm, 6mm thickness) for cable tray length ~ 150 M (layout as per Fig 1) at ~10M height as stated in the drawing at. - The steps for installing cable trays, which include marking, cutting, drilling holes, installing supports, and fixing fittings and accessories. - Common tools used for cable tray installation like saws, drills, wrenches, and levels. Some designers/specifiers utilize solid bottom. At Prime Cut Diamond Drilling, we support electricians, M&E contractors, and containment specialists by providing clean, accurate penetrations exactly where needed. 0 This method statement will cover the minimum requirements for installation of.
