

Driver Distribution Box

Overview

This distribution box ensures a quick and correct connection when connecting for example Sofia LED. You can mount up to 6 products in the box. Drivers are hidden inside fixtures, placed in ceiling voids, or scattered across the project in locations that make sense only during the first installation. At first, that approach can seem flexible. Thanks to the status indicator, you have an overview of a large number of signals. High-quality materials and robust product designs ensure a reliable connection, signal transmission and power. 6 Lights: This distribution block allows you to plug a maximum of 6 lights into a sensor switch, so there's no need to get more switches for each light. Straightforward Design: No complex features or add-ons. Compatible Sensors: Electrical Panels – Industrial HT & LT Panels. Generation, Transmission and Distribution panels. Test Benches and Laboratory Equipment.
