

Electrical distribution box expiration date

Overview

You can generally expect a power distribution box to last anywhere between 8 to 15 years, depending on the application it's being used for, the environment it's operating in, and how frequently it's serviced. An old fuse box should be replaced as soon as possible. Rubber boxes which spend their lives indoors are much more likely to have a longer. Merchandised distribution equipment and molded case circuit breakers are date coded to identify the time of manufacture. This code is useful in tracing equipment having design changes and in pinpointing areas and assembly periods. The date code is placed separately or hand-stamped directly onto the. The British Standards Institution set a program for the metrication of the construction industry to take effect between 1969 and the end of 1972. Trade in British electric cables to metric standards began in January 1970. The regulations of the VDE (Verband der Elektrotechnik Elektronik Informationstechnik e.) are particularly relevant here.
