

Equipment for producing pigtails

Overview

Pigtail machines are specialized industrial tools designed to form, bend, or terminate materials into a coiled or looped "pigtail" configuration. Our Fiber Optic Patch Cord Production Line equipment includes everything needed to manufacture high-quality patch cables and pigtails: from cable making machines and pneumatic crimpers to precision polishing fixtures and IL/RL test stations. patch cord making machine, fiber patchcord production. A pigtail is a coiled or looped section of tubing used in piping and instrumentation systems to absorb vibration, manage thermal expansion, and protect pressure instruments from direct exposure to process media. Understanding the different categories. Our coil spring manufacturing machines can produce various types of coil springs. These coil springs are used for automobiles, trains and heavy machines. We have made the machines for wire diameter up to 100mm.
