

Estonia underground fiber optic cable

Overview

Enefit Solutions, a subsidiary company under Eesti Energia, installed 45 kilometers of fiber optics cable. Antenna network was engineered by BofTel and installed by Ericsson, while Telia installed the base stations. Total cost of the project was approximately €150,000. We specialize in the installation of fibre-optic cables, providing fast and reliable solutions for high-speed data networks. This involves using GIS software to manipulate, visualize, and model data to support spatial analysis and presentation. German. This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time. Use the controls at the top to play the animation or step through year by year.
