

# Fiber Optic Cable FCFC

## Overview

OTSCABLE supplies FC-FC fiber optic cable assemblies, with single mode (9/125) and multimode (50/125 and 62.5/125) options. You can choose if it's for riser application or plenum connections or if you want it to be completely customiz. OTSCABLE supplies FC-FC fiber optic cable assemblies, with single mode (9/125) and multimode (50/125 and 62.5/125) options. You can choose if it's for riser application or plenum connections or if you want it to be completely customized, you can contact us to know more about our OEM/ODM service for FC-FC patch cords. The most common choice of application of the FC-FC patch cord is in Video over Fiber Transmission Equipment. You can also use the FC-FC patch cord in many applications such as in data communications, telecommunications, measurement/test equipment, LAN cabinets and single-mode lasers. The FC connector itself is so defined under the IEC 61754-13 stan. With FC-FC fiber optic terminations, your connected device or devices are protected under the harsh and extreme environment situations such as those with high vibrations. FC-FC patch cords have strictly overdefined precise tolerances between the cable, the optical source, the emitter and the detector that ensures reliable data transfer in high speed fiber networks.
