

Fiber Optic Cable Stripping Coating Layer

Overview

Mechanical fiber strippers for Large Diameter Fibers (LDF) for removing various coating materials from windows and fiber ends. Marcel Buijs, EMEA Business Development, Technical Sales, Fiber Optic Center, Inc. with over twenty-five years in the photonics industry, brings the latest information on making the ultimate fiber optic product and improving process yield. In some applications, “window strip” operations are required, where a short section of coating is. This application note addresses general handling of fibers from NKT Photonics, including how to strip the protective coating, how to cleave the fibers and tips for coupling light to and from the fibers. The fibers supplied. These fiber buffer stripping tools provide a quick, easy, and reliable way to remove the buffer from an optical fiber in preparation for connectorization. The typical fiber optic cable has multiple layers: the outer jacket, strength members.
