

Fiber Optic Vertical Cable Management Frame

Overview

Vertical Fiber Optic Cable Managers: Installed on the rear of 19" racks, vertical fiber cable managers are designed for vertical optical cable organization. They utilize channels or ducts to neatly route and separate optical cables. The FlexCore™ Optical Distribution Frame is a versatile front-access cabling system that provides the necessary protection for critical connections. Utilizing innovative cable management and simple, intuitive cable routing, the FlexCore ODF simplifies and reduces the time for moves, adds, and. CommScope's FiberGuide® system has been the go-to fiber raceway choice for central offices, data centers and mobile switching centers for over 30 years. A web-based configuration tool that allows users to import layouts, design raceways in a 3D format and export detailed drawings and BOMs for easy. To keep cables neatly arranged and aesthetically appealing, OCC offers vertical cable management options to organize closet space and provide additional storage space for cable routing. The Foss System is affordable with low to zero maintenance costs.
