

Fireproof partition for Asian cable trays

Overview

The most commonly used materials for fire-proof separation of cable trays are fire-proof boards, fire-proof coatings, fire-proof bags, fire-proof mud, and TST CABLES alternative products such as light fire-proof sections. Their advantages and disadvantages are as follows: Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. Fireproof Cable Tray: Protects cables during electrical construction. Customizable Capacity: Adjusts to fit various cable sizes. Spray Coating: Enhances durability and corrosion resistance. Partition Plates: Facilitates organized. Therefore, it is crucial to set up fire-blocking sections (fire sections/fire partitions) on cable trays and select appropriate fire-blocking sections (fire sections/fire partitions) materials.
