

Fixing points for cable tray elbow supports

Overview

Mounting Clamps: These are great for securing cable trays to walls or ceilings. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment. An elevation benchmark (preferably set by the general contractor) can be transferred via laser level or transit to convenient points along the length of the tray run. Cable Tray Support Locations Cable tray supports should be strategically positioned so that connectors between horizontal straight sections of the tray fall between the support point and the. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Selecting the right cable tray accessories is crucial for the safety, stability, and ease of maintenance of any electrical system.
