

H3 Gigabit Optical Module

Overview

This H3 SFP-XG-LX-SM1310 compatible SFP+ transceiver supports 10GBase-LR and 10GBase-LW throughput up to 10km over single-mode fiber (SMF). It operates at a 1310nm wavelength and features an LC duplex connector. Optical modules transmit signals over optical fibers. Following various industry standards, the transceiver complies with SFP+ MSA, SFF-8431. This time period includes the transit time for us to receive your return from the shipper (5 to 10 business days), the time it takes us to process your return once we receive it (3 to 5 business days), and the time it takes your bank to process our refund request (5 to 10 business days). The transmitter converts 10Gbit/s serial PECL or CML electrical data into serial optical data compliant with the 10GBASE-SR standard. 3CSFP93-H3 1000BASE-T SFP transceiver with RJ45 connection according to MSA standards compatible with H3C from the BlueOptics brand. Relying on 11 years of deep experience in the communication field and scientific and technological innovation ability, through the integration of multi-brand, full series of communication.
