

H3C Optical Fiber to Ethernet Switch

Overview

The H3C S9827 series is a new generation of 800G data centre switches based on CPO silicon photonics technology, and test results showed a total switching capacity of up to 51.2T, with all 64 ports achieving 100% line speed forwarding under different traffic. All-optical networks use optical signals to complete all network communication functions, eliminating the need for optical-electrical conversion within the network, thereby bypassing the challenge of improving the information processing rate of electronic devices. Compared to traditional copper. NVIDIA Networking is a leading supplier of end-to-end Ethernet and InfiniBand intelligent interconnect solutions and services for servers, storage, and hyper-converged infrastructure. Mellanox intelligent interconnect solutions increase data center efficiency by providing the highest throughput and. H3C SFP-XG-SX-MM850-E is a 10Gbps SFP+ short-range optical transceiver designed for high-speed multimode fiber connections in enterprise and data center environments. It operates at an 850nm wavelength and is typically used to enable reliable 10G Ethernet links over OM3 and OM4 fiber. H3C completed a massive test of its co-packaged optics (CPO) enabled Ethernet switch (H3C S9827) driving traffic across 64 800G ports. The companies said the test results demonstrate that H3C's 800G CPO silicon photonic switch series has "excellent reliability and stability in key performance. The H3C S6550XE-HI series is a cutting-edge, high-performance, high-density 25G/100G Ethernet switch developed by H3C using industry-leading professional ASIC technology.
