

High-efficiency UPS system 200kW for base station use

Overview

Highly efficient, modular, high-density 200kW (400/480V) 3-phase UPS that is scalable up to 500kW. It delivers top performance for medium, large, and edge data centers, as well as critical infrastructure in commercial and industrial applications. A space-saving, scalable and flexible device that's as easy to deploy as it is to manage, it's the perfect three-phase white or grey space solution for today's data center. Corner (line) grounding is not supported. The charging current is determined by the battery capacity. The Huawei UPS5000-S series UPS5000-S-200K uses 200kW UPS frame into which can be placed from one to four 50kW UPS power modules. Engineered with a three level IGBT based Inverter technology, it delivers unparalleled efficiency in a compact design.
