

How many routers are covered by fiber optic cable throughout the house

Overview

For a small house, one router is usually sufficient to provide coverage throughout the entire space. However, this depends on various factors such as the size of the house, the number of devices connected to the network, and the type of router being used. Active Star An alternate to a PON is an active star network, also called a point-to-point (P2P) or "home run" system where each subscriber has a dedicated fiber and Ethernet link to the head end or central office. The fiber is connected to an. A fiber-optic switch allows you to connect two or more fiber-optic cables to form a network. These can behave like a typical Ethernet switch. This results in ultra-fast speeds, greater reliability and significantly lower latency.
