

How much commission do optical module companies typically take

Overview

Research from Qobra shows B2B sales commission rates generally range from 7% to 15% for physical products and 20% to 50% or more for services and SaaS, due to lower overhead per sale. There are about 10 commission structures to consider, in addition to determining when reps get paid, on what, and how much in the actual comp plan. But what matters most is that the structure and compensation strategy complement one another and motivate and reward positive selling behaviors. According to Visdum, across industries, most sales commission rates typically fall within 5% to 20% of the sale value, with variations based on product complexity, sales cycle. Data centers will keep dominating optical module demand as AI and cloud drive revenue growth through 2030. It's a motivating force that drives performance, rewards success, and keeps sales teams laser-focused on their goals.
