

How much does a cold aisle server rack weigh

Overview

RDF – 500kg, RSF – 1000kg, (for ROF racks deep 1200mm – 1000kg), RHF – 1500kg, color black RAL 9005 (optionally light gray RAL 7035). Server racks have sturdy steel frames and locking cabinets to secure and organize up to 3,000 lbs. They provide safe homes for servers, storage, network hardware and all the indispensable devices that keep your network efficient and productive. For detailed technical information on RSF, RDF, RHF and ROF racks please refer to appropriate data sheets. Note: Recommendations based on room conditions compliant. In cold aisle containment, the cold aisle is enclosed. Restricted Aisle Length: If one end of the aisle is closed off or lacks a personnel exit, the maximum aisle length should be limited to 6 meters for safe access and evacuation. Generally speaking, however, a 42U server rack will weigh between 275 and 350 pounds.
