

How to adjust the length of the Singapore module

Overview

1□The focal length of the SCULPFUN laser module is fixed and cannot be changed .
2□The specific position of the laser focus is 50mm/40mm directly below the edge of the aluminum alloy shell of the laser module. Access tutorials, troubleshooting guides, and customer service for all xTool laser engravers and cutting machines. Bow press would be best, but you can back out the limb bolts, about 1 turn less than manufactured maximum and rotate the cam to clear the limb. Please note that on Supermicro systems, the maximum password length is effectively 19 characters when setting a new password (The array length is 20 characters and the string is NULL-terminated, leaving 19 characters available). 4ft, 6ft and 8ft modules can be installed as individual standalone units, or they can be joined together to create continuous runs.
