

How to bend BIM cable trays

Overview

Open the view where you want to place the cable tray. On the Options Bar, specify the width, height, offset, or bend radius. Bend cable trays in Revit with speed and accuracy using the GreaterBIM Smart Bend add-in. With GreaterBIM. Here is the simple solution Create two type : 90 elbow and 45 elbow In the real world, to make a 45 elbow, we need two segments, to make a 90 elbow, we need three segments I've also tried to use some geometry forms in revit but no hope. With its intuitive interface and robust features, Revit streamlines design, offering enhanced customization. You can specify a different multiplier for the bend radius in the Type Properties dialog for cable. Before bending a cable tray, it is crucial to prepare it properly. This involves a few essential steps to ensure a successful bending process.
