

# How to make a flat corner for a cable tray

## Overview

Purchase the appropriate number of inside and outside corner pieces that clip into place to make this task quick and easy. The range for adjustable. How to calculate size of cut-out section (D) for a pre-determined angle set Eg. Construction of a flat 90° bend (A) The amount of tray lip to be removed is equal to 2, 3/4 the width of the tray, half of this measurement will be removed on either side of the centre line. Installing straight lengths of mini trunking is relatively simple. However, if you want to wrap the cables around corners, you'll probably want to fit mini trunking corners in place to keep the cables. Would someone kindly let me know the formula to create a flat 45 in say 100 mm cable tray for example. Elbow joint RVS is pushed inside the cable tray and attached with the included screw set.
