

Is China Unicom going to replace its fiber optic cables

Overview

China Unicom Group, one of China's major telecommunications operators, has revealed plans for the construction of a nearly 3,000-kilometer-long submarine optical fiber cable, which will span from Hong Kong to Sihanoukville in southern Cambodia. Recently, a centralized procurement project of a provincial China Unicom company was announced to be terminated. Why was it suddenly terminated?

On December 2, China Unicom's provincial branch issued a bidding announcement for the centralized. Recently, the first new global carrier “Large Effective Area Fiber” (LEAF) (ITU-T standard code G. HK, hereinafter. Chinese state-owned telecom firms, China Telecom, China Mobile, and China Unicom, are developing a \$500 million undersea fiber-optic internet cable network that would link Asia, the Middle East and Europe to rival a similar US-backed project, Reuters reported, citing four people involved in the. State-owned telecom firms in China are developing a \$500 million undersea fiber-optic internet cable network to compete with a similar US-backed project, according to four people involved in the deal. The proposed EMA (Europe-Middle East-Asia) cable would connect Hong Kong to China's island. iples of moderate advancement, scientific planning, and coordinated development. It accelerates the construction of network infrastructure and actively plans computing power , enhanced the breadth and depth of mobile network coverage and user perception. This project represents Cambodia's inaugural.
