

Italy Optical Network Maintenance Toolkit

Overview

Includes maintenance tools such as a handheld light source, handheld optical power meter, visual fault locator, and cleaning pen; Provides matching standard test jumpers and adapters according to the specific optical network or optical link tested by the customer; Includes maintenance tools such as a handheld light source, handheld optical power meter, visual fault locator, and cleaning pen; Provides matching standard test jumpers and adapters according to the specific optical network or optical link tested by the customer; EXFO's optical loss test sets (OLTs) are available in dedicated handheld instruments and platform-based modules to suit various network architectures and test requirements. Tier-1 certification kit with power meter and light source, compatible with multiple duplex and multi-fiber connectors up to. An optical loss test set (OLTS) provides the most accurate insertion loss measurement on a fibre link. This test is completed by using two devices. This test is required for fibre testing as an industry. For Single-mode Fibers: Optical Loss Testers Used in Installation, Maintenance, and Troubleshooting.
