

# JSP Building Construction Power Distribution Box

## Overview

JSP series construction site power distribution box, suitable for construction sites or outdoor outdoor work site temporary low-voltage power distribution, power frequency 50Hz, rated voltage 380V AC system power distribution, control, lighting. With rain, dust and other safety protection. ENERGYBOX is a complete range of Assemblies for Construction Sites (ACS) pre-wired boards that can be wall-mounted or installed on a support. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. Other types of cables that can be used on construction sites are PVC cables and H07RN-F cables. Using the types of distributor described in the equipment standards, it is possible to set up a power supply. Yueqing Beigang Industrial Socket Distribution Box is an electrical distribution device that adopts a plug-in method, which is more convenient and practical than traditional terminal wiring. The built-in circuit breaker group ensures working performance and reliability, and is easy to use and safe. Transfer Switch The transfer switch can switch the load between the two power supplies. On the market, there are manual transfer.
