

Large power distribution box in Chile

Overview

The Central Interconnected System (SIC) serves principally household consumers, while the "Large North" Interconnected System (SING) mostly serves large industrial customers, primarily mining interests in Chile's northern regions. Overview As of August 2020 Chile had diverse sources of electric power: for the National Electric System, providing over 99% of the country's electric power, hydropower represented around 26.7% of its installed capacity, bi. There are four separate electricity systems in Chile: • the (SIC, Sistema Interconectado Central), which serves the central part of the country (75.8% of t. Total electricity coverage in Chile was as high as 99.3% in 2006. Most of the progress in rural areas, where 96.4% of the population now has access to electricity, has happened in the last 15 years, following the establis.
