

Low loss in GPON equipment

Overview

Operators deploying networks must consider these factors and might use products with reduced optical loss such as: lower loss optical splitters, low loss fiber cable, lower loss fusion splicing, and low loss fiber connectorization products. This document describes the Gigabit Passive Optical Network (GPON) technology and how it functions. There are no specific requirements for this document. Customized designs are also available for customer needs The ABS PLC Splitter is. The global market for GPON splitters, intrinsically linked to performance metrics like insertion loss, continues its upward trajectory. Valued at approximately \$X billion in 2023, analysts project a compound annual growth rate (CAGR) of Y% through 2030.
