

Maldives rack-mounted micro-module data center configuration

Overview

It uses racks as the datacenter carrier and fully integrates all sub-systems including UPSs, cooling, power distribution, lightning protection, fire control (optional), wiring, airflow management, intelligent monitoring, and more. Delta InfraSuite is a new generation, highly integrated modular datacenter solution. Pre-manufactured and fully tested means that no on-site engineering needed to activate the product. IT racks can be deployed flexibly on both sides. A single module can support maximum 12 racks and 25kW. Micro module data center SDC300-M solution is a rapid, efficient, convenient, intelligent management, integrated data center solutions that be released for fast demand of cloud computing, big data, Internet of things. It Integrated Sunsea's efficient and reliable power precision distribution system. The maiden Integrated Modular Data Center in a resort was successfully deployed and commissioned at Anantara Kihavah Maldives. The Enclosure comprises of Precision cooling with hot and cold aisle containment, UPS with extended battery runtime, Fire suppression system (NOVEC 1230), Biometric access. A micro data center is a compact, self-contained infrastructure solution that integrates compute resources, storage, power distribution, cooling systems, and security within a single rack-level unit. Designed for edge computing environments, it supports remote locations, branch offices, and.
