

Manufacturer of integrated container rack cold aisle immersion liquid cooling systems

Overview

High-density, liquid-cooled, rack-based servers for data centers, edge computing, and harsh environments. LiquidCool Solutions is the only company combining Total Liquid Immersion with Directed Flow (direct-to-chip) in a standard 19" rack. It is installed outside the white space, engineered to serve entire data halls. With over a decade of experience cooling racks beyond 400 kW, we deliver end-to-end liquid cooling, with advanced technologies like Coolant Distribution Units. Ingrasys offers a complete line of rack-level liquid cooling solutions based on where the heat is exhausted in the data center. Refer to the chart below for valuable insights into elevating your data center's efficiency and fostering a more sustainable future.

Schneider Electric Announces Integrated Rack for Data Centers with ...

At this year's Gartner IT Infrastructure, Operations & Cloud Strategies Conference in Las Vegas, Schneider Electric has announced a partnership with Avnet and Iceotope to produce the

Aug 20, 2025

DNS Rack Chiller In Row

Learn more about nVent's solutions for cold aisle containment, in row and in rack cooling, data center cooling, data room cooling, liquid cooling solutions, server

Sep 10, 2025

Immersion cooling systems: Advantages and

Immersion cooling (see Figure 2) is a liquid cooling method in which servers and other rack components are submerged in a thermally conductive

Aug 02, 2025

Inside the DataCenter Liquid Cooling Industry

With liquid-based cooling, effectively a plumbing system is introduced in the datacenter that pumps coolants to the servers. In direct-to-chip, the coolant

Apr 29, 2026

Liquid and Immersion Cooling Options for Data Centers

Long proven for mainframe and gaming applications, liquid cooling is expanding to protect rack-mounted servers in data centers worldwide. Vertiv has created a

Aug 11, 2025

Liquid Cooling Package LCP Cooling Systems

Rack cooling Data centres support corporate processes at ever-higher outputs. The packing density in computer systems is increasing, and processor capacity is growing. This leads to a continuous rise in

Mar 03, 2026

Liquid Cooling | Center of Expertise for Data Center

Liquid cooling is highly valuable in reducing energy consumption of cooling systems in data centers. We survey the landscape on different deployments of liquid
