

Maximum distance between level 3 distribution boxes

Overview

The distance between a distribution board and a switch box shall not exceed 30 meters. Distribution boards should be placed in areas where electrical equipment. The Unified Facilities Criteria (UFC) system is prescribed by MIL-STD 3007 and provides planning, design, construction, sustainment, restoration, and modernization criteria, and applies to the Military Departments, the Defense Agencies, and the DoD Field Activities in accordance with USD (AT&L). Residential: The recommended height for distribution board and consumer unit is between 1 metre to 1. As per Section-42 of Electricity Act 2003, it is the responsibility of the respective DISCOM to develop and maintain an efficient, coordinated and economical distribution system in its area of supply, hence, DISCOMs are required to install adequate. nto account the moment on pole by wind load. Electrical equipment is installed under the switch box, forming a three-level distribution. "Two level protection" mainly refers to the use of leakage protection measures.
