

Mdc optical module

Overview

MDC Europe supplies optical solutions configured for integration into semiconductor equipment platforms, supporting lithography, inspection, alignment and process monitoring applications. EDGE™ low-loss modules provide an interface between the MTP® connectors on an MTP trunk and the MDC (Mini Duplex Connectors) at the front. The internal wiring of the module is based on universal polarity to ensure the correct fibre polarity throughout the entire system, independent of how many. MDC connector, Mini Duplex Connector, a two-fiber Very Small Form Factor (VSFF) connector, is a high-density fiber optic connector for singlemode or multimode fibers. 25mm ferrule as the LC connector. Our optics portfolio includes filters, lenses, mirrors and alignment lasers selected to meet tool-specific. BluOS is NAD's advanced multi-room streaming platform, designed for effortless access to high-resolution music across your home. Seamless integration with smart home. MDC interface 100G SR4 optical module adopts QSFP package and supports MDC connector cables.
