

Methods for fixing cable tray channel steel brackets

Overview

Make the holes and fix the cable tray supports with appropriate metal plugs, mounting brackets with base plates and nuts, 'L' angles / slotted 'C' channels and nuts. 2 meter distance is maintained between the supports to avoid sagging of cable trays / ladders. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. OBO BETTERMANN has offered products and solutions for electrical installation for over 100 years. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require additional protection to support and protect numerous small. Below is the detailed cable tray installation method statement not only for cable tray but also applicable for GI ladder and trunking for indoor and outdoor applications and in service rooms like pump rooms, electrical rooms and plant rooms etc. All materials intended for cable tray, ladder and trunking shall be submitted for approval of the consultant as per the standard procedure using the Notification of permanent material received at site.
