

Methods for fixing cable tray supports in masonry walls

Overview

Support Methods: Common support methods include trapeze hangers, which are used for ceiling suspensions, and cantilever wall brackets, which are mounted directly to walls for runs along vertical surfaces. The choice depends on the building structure and the planned tray route. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challenge and safety. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Several mounting options are available for wire mesh basket trays and cable trays, improving safety, ease of maintenance, and overall effectiveness. Lock tabs down usin a screwdriver. The tray is locked into place - no additional ha installations. Cable tray hanger supports are an alternative way to support your cable tray.
