

Mozambique Optical Cable Well

Overview

The northern Mozambican port of Nacala has been linked to the world's largest submarine fibre-optic cable system to improve digital communications, enabling the telecommunications company Vodacom to offer its customers a direct international gateway for faster and more reliable. The northern Mozambican port of Nacala has been linked to the world's largest submarine fibre-optic cable system to improve digital communications, enabling the telecommunications company Vodacom to offer its customers a direct international gateway for faster and more reliable. This study explores the economic impact of the international data connectivity delivered by submarine fiber optic cables ("subsea cables") on Mozambique. Subsea cables are the global backbone of the internet, connecting people, businesses, and economies around the world. Telecommunications operator Vodacom announced this Tuesday, August 15, the arrival of the first submarine fiber optic cable in northern Mozambique, guaranteeing that it will support the growth of the country's digital economy. The Mozambique Fiber Optic Cable Market is likely to experience consistent growth rate gains over the period 2025 to 2029. According to news reports, a first-of-its-kind data centre was also officially opened by project partner.
