

Mozambique uses

Overview

Mozambique is endowed with rich and extensive natural resources. The country's economy is based chiefly on fishery—mostly molluscs, crustaceans and echinoderms—and agriculture with a growing industry of food and beverages, chemical manufacturing, aluminium and oil. Around 90% of its population uses natural resources for food and traditional medicine, being miombo forests serving as key providers for rural communities. The trade of medicinal plants also constitutes a. Mozambique, officially the Republic of Mozambique, is a country in Southeast Africa bordered by the Indian Ocean to the east, Tanzania to the north, Malawi and Zambia to the northwest, Zimbabwe to the west, and Eswatini and South Africa to the south and southwest. The country's wealth includes large reserves of natural gas, coal, and potential oil deposits, although oil production has yet to. Inclusion in an NLM database does not imply endorsement of, or agreement with, the contents by NLM or the National Institutes of Health. Miombo woodlands play an important role in the livelihood of people living in sub-equatorial African countries, contributing to satisfy basic human needs such as. The most common land use in Mozambique is overwhelmingly subsistence agriculture, practiced by a significant majority of the population for their livelihoods and food security.
