

Mpo jumper wire 100g

Overview

MPO jumper for high-density fiber connectivity, supporting 40G, 100G, 400G and up to 800G networks. Available in OS2, OM3, OM4 and OM5, with low insertion loss and reliable performance for data centers and telecom applications. OM4 MTP/MPO to MTP/MPO 12 Strand Multi-Fiber Patch Cable. They are typically used for patching within a cabinet. MPO cable, a cost-effective alternative to time-consuming field termination, is designed for high-density. MPO jumper cables (also known as MPO fiber patch cables) are fiber optic cables terminated with MPO connectors on both ends, enabling multi-fiber high-density connections between network equipment. Unlike traditional duplex patch cords, MPO jumpers support multiple fibers in a single connector. The Bynet MPO/MTP to MPO/MTP OS2 Jumper is an advanced high-density fiber interconnect solution designed for modern data centers, cloud computing clusters, and high-performance switching environments. Need Help with a Product You Own?

We have a range of accessories designed to work with our products. Check them out! More Q&As may be available on the N84605M24P model support page.
