

New Zealand 800G Optical Module QSFP-DD

Overview

The 800G QSFP-DD SR8 adopts the advanced QSFP-DD form factor and is equipped with one MPO-16 interface. This module uses 8 channels of 850nm VCSEL lasers and PAM4 modulation technology, with a per-channel transmission rate of up to 106.25Gbps and an aggregated bandwidth of 800G. Cisco QSFP-DD and OSFP 800G ZR/ZR+ digital coherent optics modules enable 800G traffic over amplified Dense Wavelength-Division Multiplexing (DWDM) links up to 120 km for 800ZR and over 1000 km for 800G ZR+. As a. 800G Telecom OIF 800ZR, High Tx output power (0dBm), L-band 5THz tunable, 0°C to 70°C, LC receptacle. OSFP is a native form factor platform designed specifically for 112 Gbps PAM4 and next-generation electrical lanes. Its larger size, integrated metal thermal substrate, and enhanced connector pin current capacity provide necessary thermal management and power delivery headroom for high-speed DSPs.
