

New Zealand Optical Line Terminal 1G

Overview

Each PON line supports 1Gbps upstream and downstream symmetrical bandwidth. The optical line terminal features high QOS and flexible dynamic bandwidth allocation, it can implement any change from 1M to 1G access bandwidth. Our typical optical line terminal adopts 19 inch size rack design, it is with 3U height and 16 slots, every 2 of them is offered to one OLT module. At the heart of a point-to-multi-point or passive optical network (PON) is the optical line terminal (OLT). Modern OLTs offer communication service providers (CSP) the ability to launch multigigabit services to tens of thousands of subscribers from a single location or just ten. Fiber-to-the-home. Fibre Optic Transmitters, Receivers, Transceivers 1Gbps, Single-mode, 1310nm, LC, 20Km, DDMI New from this manufacturer. Download the free Library Loader to convert this file for your ECAD Tool.
